

Email 04.12.19 from F Humphreys re Welland Farm

Dear Richard

When you talk of the plans for the above in the Parish Magazine, there is no mention of any carbon emission savings being made. No more houses should be built in our village without either ground source heat pumps, plus PV's, or alternative air source methods. Before the houses are built they have a perfect opportunity to drill the necessary pipework.

Kind regards

Fizz Humphreys
