Subject: Seaton Road planning application

Good morning, after reading the Eco report and the re application plans, I see no objection to this development going ahead. The positive points outweigh the negatives, i.e. on the insulation, heating and one most important point, the applicant's love of farming together with the environment which is most uppermost at this present time for us our children and grandchildren. We need, not only in the village young entrepreneurs who are willing to take on a challenge, so let this happen, as I have said before, for future generations. Many of us have had our lives without the worries of today's young how to feed our growing population, let's go forward. If you want to be eco, stop murdering the hedges, leaving no food for the birds in winter and stop cutting the verges in and around the village. That's important.

Thank you.
