

Email of 24 May from Robyn Green at RCC

Dear Cllr,

RCC have now completed the initial assessment of ITCP-2019-39 Barrowden. Please see the attached document.

In the cabinet report from Tuesday 12th January 2021, the Highways and Transport working Group progress was reviewed. As part of the review it was approved to carry out an initial assessment of schemes before taking them forward to feasibility (if required). Through the initial assessment, works to address concerns would be classified as one of four categories; Essential, Necessary, Beneficial and Amenity

If the works are deemed as essential or necessary, the concern will move forward to feasibility, to identify if there is a viable engineering solution to combat the problem.

If the works are defined as beneficial or amenity, the concern won't be considered any further, unless alternative funding sources become available or there is an under spend of funding at the end of the financial year and all essential or necessary works have been completed. At this point, any beneficial or amenity schemes may be considered for use of the under spend.

If you have any questions please do not hesitate to contact me

Thank you

Robyn Green | Highways Engineer (Development Control)
Rutland County Council
